OBJECTIVE

To obtain a challenging position in a software development role that utilizes my technical skills in full stack development.

EDUCATION AND WORK EXPERIENCE

NOVEMBER 2020 TO DATE

BACHELOR OF SCIENCE IN COMPUTER SCIENCE, DEDAN KIMATHI UNIVERSITY

Dedan Kimathi University, Nyeri, Kenya
B.Sc. Computer Science (expected graduation: DEC 2024)
Mean Grade of 68, a second class upper.

2016-2019

SECONDARY EDUCATION, KAGUMO HIGH SCHOOL

I attained a mean grade of 73 points which is a B+, with an A in mathematics and A- in business.

MAY 2ND - JULY 27TH 2023

INTERNSHIP AT THE JITU

During my internship I had the valuable opportunity to learn web development intricacies from accomplished developers, resulting in my certification as a full-stack web developer by the company.

SKILLS

- Frontend Development: Skilled in HTML, CSS, and React JavaScript framework for creating modern and responsive user interfaces. Proficient in Flutter and Dart for building frontend applications.

- Backend Development: Proficient in Node.js and Express for building robust server-side applications and APIs. Experienced with Spring Boot framework for building Java applications.

- Database Management: Experienced in SQL with a focus on MSSQL for efficient data storage and retrieval. Proficient in Firebase and MongoDB for real-time cloud-based database and authentication services.

- Full-stack Web Development: Able to develop end-to-end web applications, including database design, API development, and frontend implementation.

- Docker: Proficient in containerization using Docker for seamless application deployment and management.

PROJECTS

1. Fullstack Movie-review app
   - A simple full-stack application built using React for the frontend and Spring Boot with MongoDB for the backend.
   - It provides users with the ability to view movie trailers and write reviews for movies. [Github Link](#)
2. Admin-panel
   - This is a simple full-stack project built using Flutter for the frontend and Java with Spring Boot for the backend.
   - The project allows users to perform CRUD (Create, Read, Update, Delete) operations on products, as well as search, filter, and order them. [Github Link](#)
3. Fullstack Online Bookstore (MSSQL, Node.js, Express, React)
   - Served as the team lead in the development of a comprehensive online bookstore application.
   - Utilized MSSQL for database management, Node.js, and Express for API development.
   - Implemented the frontend using React for seamless user interactions. [Github Link](#)

4. Fullstack Social Media Application (MSSQL, Node.js, Express, React)
   - Built a full-stack social media application for sharing posts and connecting with friends.
   - Utilized MSSQL for efficient data storage, Node.js, and Express for API development.
   - Developed the frontend using React for a smooth and engaging user experience. [Github Link](#)
